<b>ALCO-ROGERS</b>	62 Paterson, N J – 1905 –1915

# Atlas locomotives and cars sent to Puerto Rico

**1907 ~ 1977**

Atlas started business in 1907, building what one would call small mine type locomotives.

As need and demand increases, they built small electrically powered vehicles, powered flat cars, and, finally, in the WW2 era, large locomotives.

## Locomotive Types

T/E = Trolley Electric ~ TR/E = 3<sup>rd</sup> Rail Electric - S/B = Storage Battery ~ B/E = Battery Electric

T/B/E = Trolley & Battery Electric ~

G/E = Gas Electric ~ O/E = Oil Electric (Diesel) ~ D/E = Diesel Electric - D/H = Diesel Hydraulic

The roster(s) below reflect Atlas' variety of equipment produced.

There are two rosters included. The first one is solely locomotives, irrelevant of size or type.

The second roster reflects "rolling stock". This can mean anything from storage battery powered flat cars, of which there were many, to electrically powered baggage trucks, tractors of all types and other assorted powered equipment

Since there are 2 separate rosters, remember that there will be gaps in construction numbers – meaning there is something other than locomotives (or rolling stock) built in that number group.
